

CHRISVIE JOHN RIVERA

Full-Stack & Mobile Developer | Ex-Healthcare IT

☎ +639061323525 ✉ riveracjjanjan6@gmail.com 📍 Philippines, South cot., Koronadal

ABOUT ME

Experience Software Development with experience on designing, building, and deploying scalable mobile and web applications. Combining deep full-stack and mobile development expertise with a strong foundation in Healthcare IT Administration, including technical helpdesk support, network troubleshooting, system administration, and quality assurance. Proven ability to bridge the gap between robust software solutions and secure, reliable IT infrastructure to deliver exceptional business value.

EDUCATION

BS INFORMATION TECHNOLOGY

South East Asian Institute of Technology | 2015-2024

MASTER INFORMATION TECHNOLOGY

Notre Dame of Marbel University | 2025-2026

WORK EXPERIENCE

Freelancing - Software Developer

Philippines 2024 - 2026

Experienced Application and Web Developer specializing in dynamic, data-driven applications. Developed and emphasizing clean architecture, security, and maintainable backend logic. Skilled in creating custom CMS solutions, admin dashboards, and RESTful APIs, delivering scalable and efficient webapp applications.

Management Information System

Dr. Arturo P. Pingoy Medical Center | 2024 - 2026

Manage local IT infrastructure, providing technical helpdesk support, system troubleshooting, system maintenance, and basic network administration for high-availability systems. Thus Maintained data integrity and system reliability across healthcare databases, ensuring zero downtime for critical service operations.

CORE SKILLS

Web Development

- Backend: PHP, Node.js, REST APIs
- Frontend: JavaScript, HTML5, CSS3, Bootstrap5, Tailwind CSS
- Architectures: Full-stack dashboard design, responsive web applications

Cross-Platform Development

- Framework: Flutter
- Language: Dart
- Ecosystem: Android, iOS, Web, and Desktop deployment; state management; third-party API integration

Databases & Architecture

- Engines: MySQL, MariaDB
- Optimization: Database Normalization, indexing, query tuning
- High Availability: Master-Slave Replication, data consistency management

IT Infrastructure & Administration

- Systems Admin: IT Administration, Helpdesk Support, user access management
- Infrastructure: CGNAT bypassing (Cloudflare Tunnels), network troubleshooting
- Hardware: Hardware Diagnostics, system maintenance, and deployment
